## UNIVERSAL PLASTIC WELDING RIBBON

UNI-FLEX Fiber Ribbon Rod is a thermal plastic adhesive that sticks to most plastics. It also contains carbon and glass fibers to give greater reinforcing strength. Works fantastic on TPO! Each ribbon is 1/4" x 12".

## REINFORCING MESH

Reinforcing wire mesh that is designed to be used with #6018 UNI-FLEX Fiber Ribbon and can be used on any type of thermoplastic repair. Recommended for use for when the tear goes to the edge of the plastic. Can also be used to fabricate tabs, fill holes and provide additional reinforcement to any thermoplastic (melttable plastic) repair. Made from stainless steel (5 times stronger than regular aluminum wire screen), each piece is 5 x 10 inches.
