

## **SKNOT -ON-A-ROLL™**

### *Acrylic Transfer Adhesive*

This labor saving product is used primarily for reattaching metal and plastic nameplates and emblems. SKNOT-ON-A-ROLL is a high-tack acrylic transfer adhesive, 2mil thickness, which eliminates having to remove the old tape off of the back of nameplates and emblems. It also eliminates having to trim out around letters and emblems using a razor blade or knife which may damage the nameplate, emblem or injure the technician. Can be used on metal, plastic, glass, paper, wood and foils.

***Eliminates Removing Old Tapes***

***Eliminates Trimming Out Around Letters***

***Immediate Adhesion - Aggressive Acrylic Adhesive***

***Bond Strength Increases With Age***

***Conforms Easily To Irregular Surfaces***

***Excellent Resistance To Weather, Heat, Salt Spray and Chemicals***

***Wide Temperature Range***

***Reduces Technician Injury***

#### **DIRECTIONS:**

1. Clean off the old adhesive and contaminants with #1700 or #4700 IES Super Cleaning Solvent (where applicable) or #1780 Specialty Adhesive Remover. Leave the original tape intact.
2. Allow all of the cleaning solvent to flash off completely.
3. Apply SKNOT-ON-A-ROLL to the backside of the emblem or nameplate. If needed, a double layer can be used.
4. Remove the excess acrylic adhesive prior to installation using a pencil eraser, or pen in the open areas of the emblem.
5. Apply the name plate or emblem and press firmly into place.
