

INTER-POUCH 5

FAST SET EPOXY

A great two part high-strength epoxy adhesive-filler-surfacer in a handy single shot squeeze package. Bonds: plastic, metal, glass, wood, ceramic, marble, brick, stone, concrete and much more.

DIRECTIONS

Fold the dual-component pouch in half at the indicated fold line. Have the label facing outward. Press product up and away from the "cut-line".

Using a scissors or razor knife, cut-off the edge of the pouch marked "cut line".

Lay the pouch onto a mixing board. Hold the folded pouch down at the uncured end with your fingers.

Using your other hand, hold a mixing stick on its edge and "squeeze" the contents of the pouch out and onto the mixing board.

Using the mixing stick, mix the resin and hardener thoroughly until color is uniform.

Bonds: plastic, metal, glass, wood, ceramic, marble, brick, stone, concrete and much more.

Working Time:	5 minutes approx.
Handling Time:	10 minutes approx.
Sandable:	15 to 30 minutes
Paintable:	10 minutes
Full Cure:	6 to 8 hours
